

1. (canceled)
2. (currently amended) The method of Claim [[1]] 24 further comprising the step of rewarding physicians' efforts to reduce costs by providing a share of savings in response to said clinical procedure utilizing said standardized procedure.
3. (currently amended) The method of Claim [[1]] 24 wherein said collecting step comprises determining resources used in said clinical procedure.
4. (currently amended) The method of Claim [[1]] 24 wherein said establishing step comprises identifying resources to be used to establish said benchmark for said clinical procedure.
5. (currently amended) The method of Claim [[1]] 24 wherein standardizing step comprises setting the quantity of at least one resource to be used for said clinical procedure while correlating the clinical outcome.
6. (currently amended) The method of Claim [[1]] 24 further comprising the steps of accepting a request for said clinical procedure, and requesting resources to be utilized in said clinical procedure based upon said benchmark.
7. (currently amended) The method of Claim [[1]] 24 further comprising the steps of accepting a request for said clinical procedure, and allocating resources to said clinical procedure based upon said benchmark.
8. (previously presented) The method of Claim 7 further comprising the step of verifying the existence of supplies in inventory.
9. (previously presented) The method of Claim 7 further comprising the step of scheduling the requisitioning of supplies based upon said benchmark.
10. (previously presented) The method of Claim 7 further comprising the step of automatically ordering supplies from vendors based upon the needs of the clinical practice based upon said benchmark.
11. (currently amended) The method of Claim [[1]] 24 further comprising the step of compiling a report of resources utilization based upon said data.
12. (previously presented) The method of Claim 11 wherein said report comprises a clinical outcomes report.

13. (previously presented) The method of Claim 11 wherein said report comprises a procedure results report.
14. (previously presented) The method of Claim 11 wherein said report comprises a patient profile report.
15. (previously presented) The method of Claim 11 wherein said report comprises information on medication used during said clinical procedure.
16. (previously presented) The method of Claim 11 wherein said report comprises information on the length of stay of patients undergoing said clinical procedures.
17. (previously presented) The method of Claim 11 wherein said report comprises information on the demographics of patients undergoing said clinical procedure.
18. (currently amended) The method of Claim [[1]] 24 wherein said collecting step comprises monitoring the cost of said clinical procedure to provide a benchmark.
19. (currently amended) The method of Claim [[1]] 24 wherein said collecting step comprises monitoring costs of requisitioned supplies.
20. (currently amended) The method of Claim [[1]] 24 wherein said collecting step comprises storing said data collected from performing said clinical procedures.
- 21-23 (canceled)
24. (new) A computer-implemented method of increasing resource utilization efficiency and identifying areas to enhance quality, the method comprising the steps of:
  - collecting data related to a specific clinical procedure;
  - establishing a benchmark related to the specific clinical procedure based upon at least a portion of the data; and
  - standardizing the specific clinical procedure based upon the benchmark.
25. (new) A computer-implemented method of increasing resource utilization efficiency and identifying areas to enhance quality, the method comprising the steps of:
  - allocating a first set of a resource;
  - performing a specific clinical procedure during which time at least a portion of the first set of the resource is utilized;
  - collecting data related to the use of the at least a portion of the first set of the resource utilized performing the specific clinical procedure;

BEST AVAILABLE COPY

determining from at least a portion of the data reduction opportunities for the resource for the specific clinical procedure;

establishing a benchmark related to the utilization of the resource during the specific clinical procedure, the benchmark correlating to a second set of the resource; and  
standardizing the specific clinical procedure based upon the benchmark, such that in a subsequent specific clinical procedure, the second set of the resource is allocated for the subsequent specific clinical procedure.

26. (new) The method of Claim 25 further comprising the step of rewarding physicians' efforts to reduce costs by providing a share of savings in response to utilizing the standardized specific clinical procedure.
